IEEE HPSR™
IEEE 21st International Conference on High Performance Switching and Routing
May 11 - 14, 2020
Newark, New Jersey, USA

About

The 2020 IEEE 21st International Conference on High Performance Switching and Routing (HPSR 2020) will be held at the New Jersey Institute of Technology in Newark, USA, from the 11th to the 14th of May.

HPSR 2020 will feature scientific papers presented in various tracks focusing on how breakthrough changes occurring to networks and telecom are affecting areas related to switching and routing, and communication networks in general. Speakers will present thought-provoking works on big-data, data-analytics, cloud services, machine-learning techniques applied to network switching and routing.

HPSR 2020 will also host tutorials on similar topics addressing numerous challenges of today's data networks, which are being subject to significant changes driven by cloud computing, Internet of things, 5G, Industry 4.0, etc. HPSR 2020 offers exhibitors an outstanding opportunity to showcase their products and applications to an engaged audience and provides a platform to reach a vibrant audience from both industry and academia all across the world.

We would be delighted to welcome you in Newark, USA as a member of our patronage team. The ways to support the conference are manifold.
